

AVENTURINE

Aventurine is a form of quartz, characterized by its translucency and the presence of platy mineral inclusions that give a shimmering or glistening effect termed *aventurescence*. Green Aventurine is known as the "Stone of Opportunity," thought to be the luckiest of all crystals, especially in manifesting prosperity and wealth, or for increasing favor in competitions or games of chance. Its winning energy makes it a great ally for boosting one's chances in any situation - a first date, tax audit, even landing a promotion.
