

PURPLE FLUORITE

Fluorite is composed of calcium fluoride and is a member of the Halide family. It is transparent to translucent with a vitreous luster, and crystallizes in well-formed isometric cubes, nodules, clusters, or in massive form. It is the only common mineral with perfect cleavage in four directions.

Purple Fluorite is the most peace-giving of the Fluorites, dedicated to the devotional aspects of the mind that connect with Spirit. It enhances intuition and brings order out of chaos. Purple Fluorite dispels negative energy. It then re-energizes the atmosphere. This is a wonderful crystal to have on hand when you need to come up with new ideas; are brainstorming; have writer's block or need to get out of a mental rut. Purple Fluorite is excellent at increasing one's mental capacities and inspiring creativity.
