

#### BLUE BARITE

Barite, commonly spelled baryte, is well-known for its great range of colors and varied crystal forms and habits. Barite helps one journey into the inner mansions of the soul, not to escape life but to enrich it through self-discovery and self-mastery. It helps one maintain contact with one's higher self and removes the spiritual 'blind folds' that keep us from seeing situations, current and past, with truth and love.
